Please find below and/or attached an Office communication concerning this application or proceeding.

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b). Art Unit: 3617

Drawings

1. The drawings are objected to because figures 1 and 2 are labeled as "prior art," but the specification on pages 3 and 4 describes them as being the preferred embodiment" of the invention.

- 2. The drawings are objected to under 37 CFR 1.83(a) because they fail to show the rivets as described on page 6 of the specification. Any structural detail that is essential for a proper understanding of the disclosed invention should be shown in the drawing. MPEP § 608.02(d).
- 3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the "weld" of claim 4 must be shown or the feature canceled from the claim.

No new matter should be entered.

4. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering

Art Unit: 3617

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Specification

5. The disclosure is objected to because of the following informalities:

On page 1 the term "Related Art" is objected to since it is not clear what this would encompass. If this term is meant to refer to the "Prior Art" then the heading for paragraph 2 should be changed to the correct term.

Appropriate correction is required.

Claim Objections

6. Claims 1-6 are objected to because of the following informalities:

The format of the claims is informal. Claims should be in single sentence form only.

Phrases such as "the said" are redundant and confusing.

The phrase "As mentioned" in each of the claims is informal and should be changed to a more acceptable term.

Appropriate correction is required.

Applicant should see 37 CFR 1.75 and MPEP § 608.01(m) for information on the

Application/Control Number: 10/774,431 Page 4

Art Unit: 3617

proper construction of claims.

Claim Rejections - 35 USC § 112

7. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

8. Claims 1-6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1 the "structure" of line 10 lacks antecedent basis.

Claim Rejections - 35 USC § 102

9. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 10. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Woldring et al.

Claim Rejections - 35 USC § 103

- 11. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the

invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

12. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Woldring et al in view of Schultz, Jr.

To use welds to join the discs and/or side plates would have been obvious as taught by Schultz, Jr. in order to build a more solid structure.

13. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Woldring et al in view of Hawley et al.

For the side plates 20 of Woldring et al to include an arcuate rim portion would have been obvious as taught by Hawley et al in order to strengthen the wheel at the rim. See figure 2 of Hawley which shows the arcuate portion of the side plate 10 as it joins the rim 12.

14. Claim 6 is rejected under 35 U.S.C. 103(a) as being unpatentable over Woldring et al in view of Eksergian.

It would have been obvious to provide the side plate with an annular shoulder around the mounting hole as taught by Eksergian in order to better align the mounting holes of the side plate and the disc.

Conclusion

15. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The references show other wheel assemblies.
